

Disinfectant Dispenser

ODS100 - Made in Germany

Sensor-controlled disinfection dispenser for bus and train

Protect yourself and your passengers with the OES disinfection dispenser - ODS100!

This sensor-controlled operation enables contact-free and precise disinfection of hands.

The fine spray prevents soiling of the floor and surrounding components. The dosage can be variably adjusted in 10 steps from 0.5 – 5 ml. This enables up to 1000 spraying processes with one filling. Due to the simple plug & play installation with the vehicles own power supply, there is no need for tiresome changing and charging of batteries.

Features

Sensor-controlled operation

Wide spray cone for complete wetting of the hands

Programmable dosage

Compatible with all liquid hand disinfectants*

24 VDC Operation voltage

Lockable, vandalism-protected V2A housing
